

**Disable Bi-Directional Communication** – the setting will significantly reduce the print job spooling time.

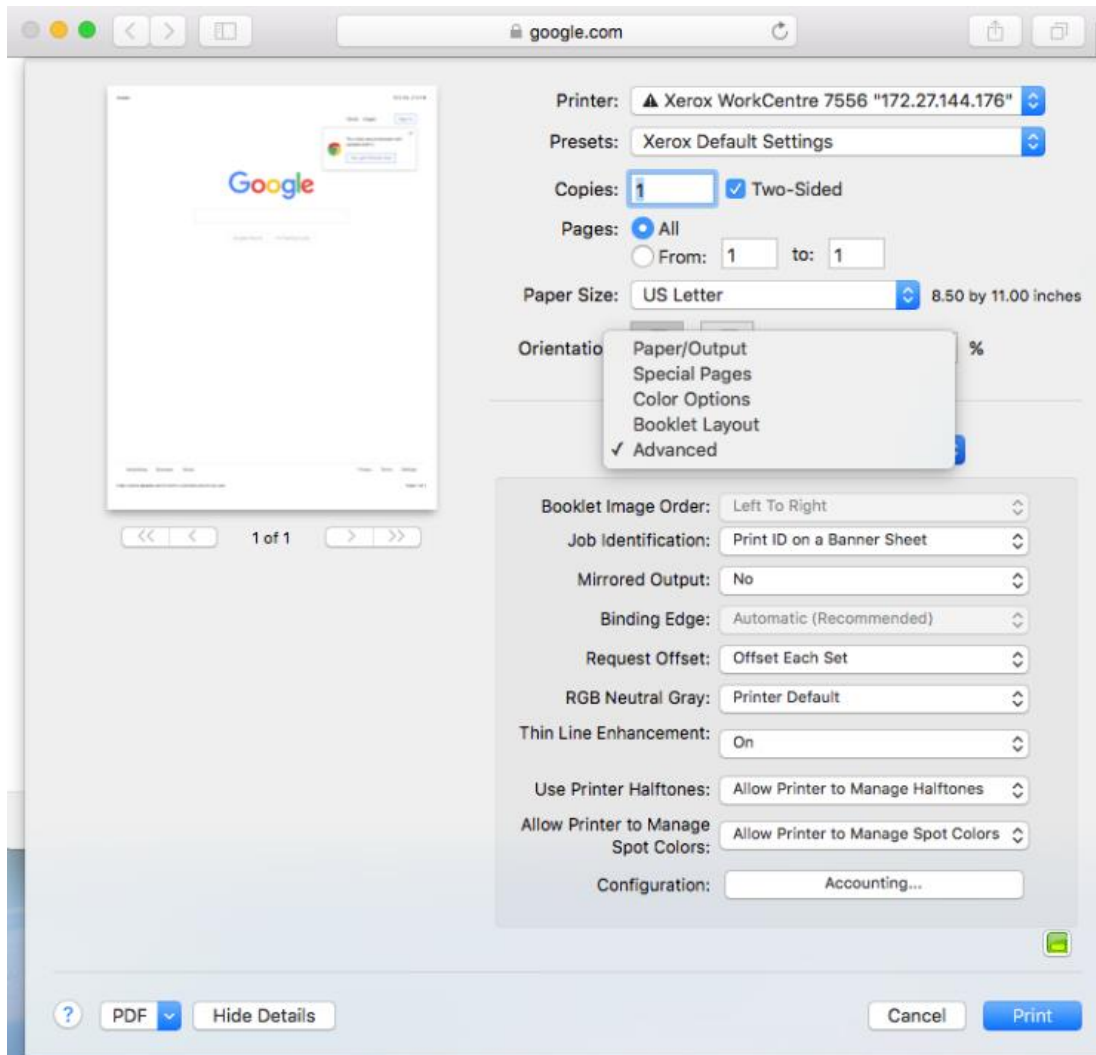

Open Safari browser -> select print

Select Xerox Features

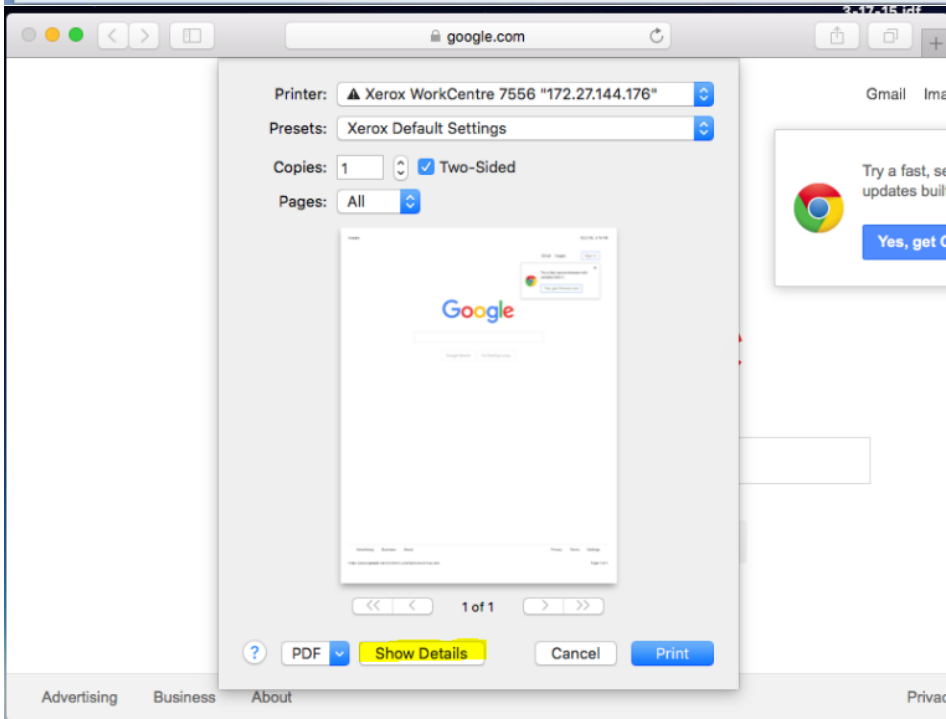

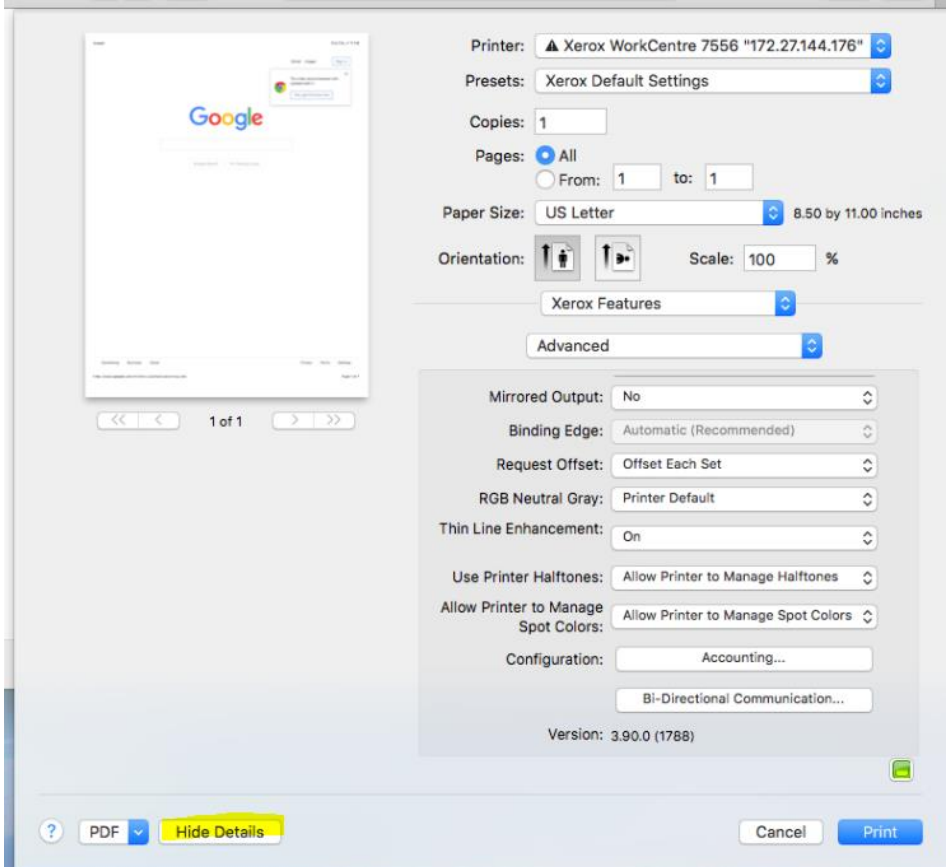

## Select Advanced

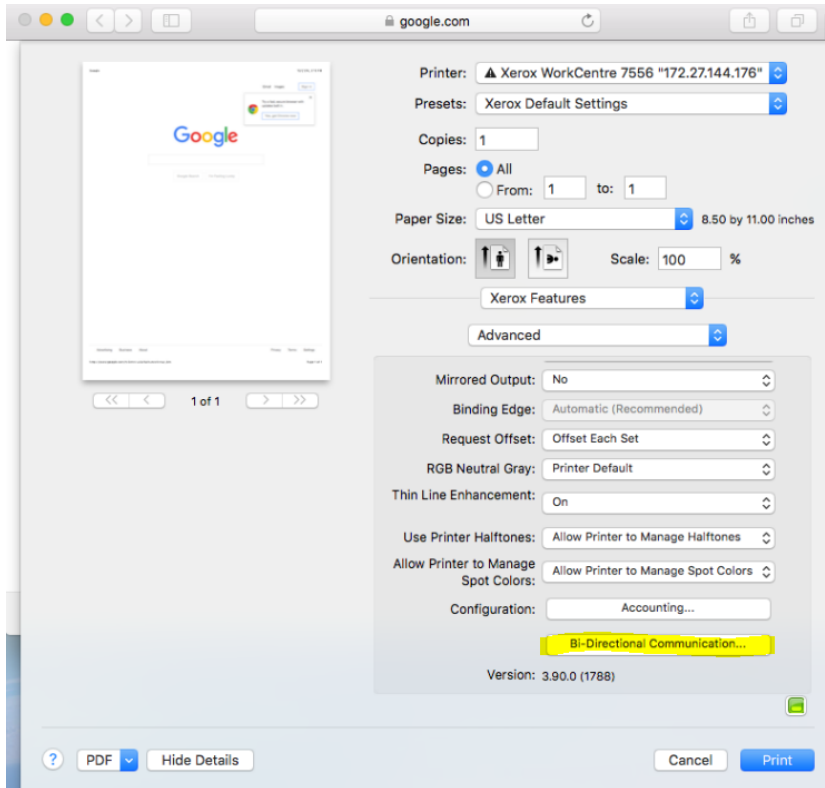

If you do not see or cannot scroll down to see the Bi-Directional Communication option, follow the next 2 steps.

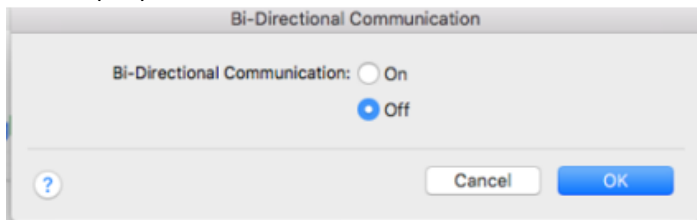

Toggle the Hide Details and show Details button. You will see the scroll bar for about 2 seconds. Select the scroll bar and then you can move down to see Bi-Directional Communication.

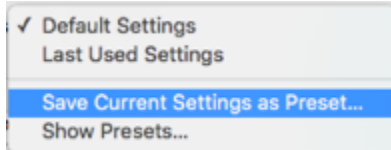

## Select Bi-Directional Communication

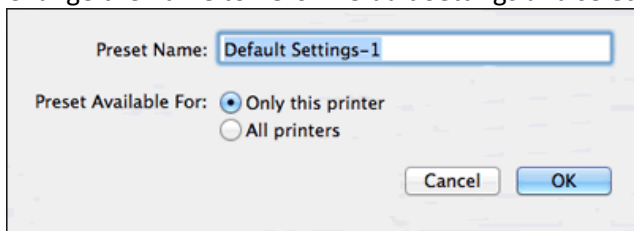

## Disable(Off) Bi-Directional Communication

## Select Presets-> Save Current Settings as Presets

## Change the name to Xerox Default Settings and select only this printer

Save -> done
